**Eco-Friendly Luxury at Hotel Sezz Saint-Tropez**

Hotel Sezz Saint-Tropez takes environmentalism seriously. Thanks to the resort's attention to water conservation, recycling, and energy-saving initiatives, guests can relax in guilt-free bliss in the knowledge that their ecological footprint is kept to a minimum. At the same time they can enjoy all the services and amenities of a luxury resort.

Hotel Sezz Saint-Tropez, located a few minutes outside Saint-Tropez, is not only a hideaway for nature lovers but also a place for peace seekers. With laurels, pines, palms and eucalyptus trees Ponceau has created the epitome of a Mediterranean garden.

Like in a small Provencal village, the 37 ground-floor rooms, suites and villas are grouped around the heart of the hotel: the azure pool. Here, guests can relax and unwind on the lounge chairs and sunbeds that Christophe Pillet created. The nearest beach and the centre of Saint-Tropez can easily be reached with the bikes that the hotel offers.
